

The Albuquerque APA Chapter, Inc of the American Payroll Association

Are you committed to becoming a CPP?

If so, local Certified Payroll Professionals (CPP's) have volunteered to form a study group to assist and mentor those individuals who are interested in taking the National American Payroll Association's Certified Payroll Professional examination. These tests are given in April-May and September-October of each year. The group meetings will be held twice a week.

What is the CPP? The goals of the APA Certification program is to promote the standard for payroll professionals, to encourage professional growth and individual study by payroll professionals, to provide the standard of requisite knowledge for the payroll professional, to measure by means of the certification examination the attainment and application of that standard, and to recognize formally those colleagues who continue to meet the requirements of the APA Certification Board.

Study Reference: For Fall 2011 and Spring 2012 testing will be on the APA's 2011 Payroll Source.

We need commitment for the Fall 2011 group by April 26, 2011. Ordering the books for the start of May needs to be done by May 5, 2011. Price for the book will be dependent on the number of books ordered.

If you are interested in this study group, please fax this form to Sandi Keller, fax number 891-9169.
